

THE TELEFLEX ACADEMY

Clinical & Medical Affairs – EZ-IO® Cadaver Laboratory Invitation

Arrow EZ-IO® Cadaveric Procedural Lab Program

Offered at different dedicated locations, the procedural lab program is designed to provide the unique opportunity for healthcare providers to understand and practice EZ-IO® procedures using cadaveric specimens in a safe & realistic environment.

These programs help overcome apprehension and build confidence, and can be incredibly impactful in changing practice. Healthcare providers will enhance their understanding of EZ-IO® procedures and their associated risks, complications and benefits. Upon completion of this course, participants will demonstrate an understanding of anatomy, physiological process and clinical applications, including increased skill proficiency in EZ-IO insertion and care management.

The lab provides registered health care professional with an interactive and engaging workshop designed to provide practitioners with the knowledge and skills to use the Arrow EZ-IO® Intraosseous Vascular Access System. Each workshop is approximately 2.5 hours long with a mixture of theory and practical skills using cadaveric tissue.
